EDUCATION

SRM Institute of Science and Technology, Ramapuram, Chennai 2024 – 2028
B.Tech in Computer Science & Engineering (CSE) | CGPA: 8.7 / 10.0

EXPERIENCE

CodeVedX Jun 2026 – Present | Remote
Software Development Intern
- Developing software features in an agile team, delivering clean code and participating in peer code reviews.
- Applying full-stack development skills to real-world projects, strengthening proficiency in REST APIs and component design.

Dezprox Nov 2025 – Apr 2026 | Remote
Web Development Intern
- Built and maintained responsive, cross-browser web pages using HTML5, CSS3, and JavaScript, improving UI/UX quality.
- Implemented component-based design patterns to enhance frontend performance and delivered debugged solutions for client projects.

TMIS Jun 2025 – Jul 2025 | Remote
Artificial Intelligence Intern
- Developed AI-based applications targeting real-world problems using Python, TensorFlow, and ML frameworks.
- Gained end-to-end exposure to AI model deployment workflows and implementation best practices.

Decodelabs Jun 1 – Jul 1, 2025 (1 month) | Remote
Full stack Intern
- Contributed to ongoing projects, applying technical skills in a remote team environment.

InternPe Jan 2025 – Feb 2025 | Remote
AI/ML Intern
- Applied supervised and unsupervised ML algorithms to industry use-cases using Python, Scikit-learn, and data pipelines.

PROJECTS

Offline Transaction System | *Python, SQL, HTML, CSS*
- Designed a secure offline transaction tracking system ensuring data reliability without persistent internet connectivity; implemented robust local data storage.

AI Deepfake Detection | *Python, C, OpenCV, HTML*
- Built an AI model to detect manipulated media using computer vision techniques; applied preprocessing pipelines and model evaluation to achieve reliable classification accuracy.

MindBuddy | *HTML, CSS, JavaScript*
- Developed a responsive mental health support web application with accessible UI/UX design principles, focusing on usability and cross-browser compatibility.

SheRise | *HTML, CSS, JavaScript*
- Engineered a women's health and empowerment web application addressing a real-world social impact use case, incorporating dynamic content and accessible design.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, C++
Web Development: HTML, CSS, JavaScript, React.js, Node.js, Flask, Responsive Design
AI / ML: Machine Learning, Deep Learning, Deepfake Detection, TensorFlow, Pandas, NumPy.
Tools & Platforms: Git, GitHub, VS Code, Excel
Concepts: Data Structures & Algorithms, OOP, REST APIs, Agile/SDLC, Software Engineering, Problem Solving

LEADERSHIP & ACHIEVEMENTS

- Smart India Hackathon (2024 and 2025) — Team Lead; top 50 finalist, directed solution design and cross-functional team coordination for national-level competition.
- TAMCAM Hackathon — Pre-Finalist; recognized among top teams at national level.
- WWT Women's Hackathon — Solo participant, managed full project lifecycle from ideation to final presentation.
- Co-Lead, Logic Play Technical Club — Mentored 60+ students, organized technical workshops and coding events.
- THREX Hackathon at SRMSIT — Top 20 Finish; demonstrated strong competitive technical execution.
- Defy Hackathon at VIT — Team Lead; directed solution design and cross-functional team coordination for national-level competition.
